

GEOLOGICAL

SCAVENGER HUNT

Name _____

1. Draw a picture of one (1) fossil you see as you walk down the rock steps.

2. While looking at the stream, which letter best represents the flow of the water?
Circle one (1).

a. **Z**

b. **S**

c. **O**

3. Find a living organism in the stream. Draw and label it.

4. a. Find a piece of shale.

What color is it? _____

Is it hard or soft? (circle your answer)

b. Find a piece of limestone.

What color is it? _____

Is it hard or soft? (circle your answer)

5. Use the clues and unscramble the letters to name the fossil.

a. These fossils are usually found rolled up in to a ball.

They are related to modern day insects, spiders, lobsters and crabs.

botirtiles

b. These are fossils left behind by living organisms.

catre silssof

c. This is the shallow sea that covered the Cincinnati area 450 million years ago.

docinaviro esa

6. At Stream Access C, near one end of the stepping stones, find the Cephalopod molds in one of the stones. Use the ruler to measure the fossil.

How long is it? _____

Draw a picture of what the cephalopod might have looked like when it was alive.

7. Draw your favorite fossil!

When you complete your Scavenger Hunt, take this paper to the Front Desk Naturalist and claim your prize!
